THE ARMY MEDICAL LIBRARY
Washington, D. C.

THE ARMY MEDICAL LIBRARY

PHOTODUPLICATION SERVICE

The purpose of photoduplication is to extend the services of the Library to those at a distance who cannot come in person to consult its collections. In the case of the Army Medical Library it provides an economical and efficient means of contributing more largely to the advancement of medicine and the public welfare.

In order that photoduplication may render the greatest possible aid to those engaged in medical research, the following policies in regard to its conduct will be observed:

1. The Library will lend without charge single microfilm copies of original articles published in medical periodicals not available locally. Such loan requests should be routed through libraries, governmental agencies, or research institutions. The microfilm, being part of the duplicate collection of the Library may be used for ninety days and will be returned to the Library at the end of the loan period.
2. Requests for microfilms and photoprints for official business in the Department of Defense will be filled free of charge.
3. Microfilms will also be sold to those desiring to retain them, at a rate of 50 cents for each 50 pages or fraction thereof from a single article.
4. For the benefit of those not having the facilities to read microfilms, photoprint copies of separate articles from periodicals will be supplied at a charge of 50 cents for each 5 consecutive pages or fraction thereof from a single article.
5. Except when the order is accompanied by the written permission of the copyright owner, The Army Medical Library will not reproduce books protected by copyright, or entire periodical issues.

INSTRUCTIONS

All requests, including those for free loans, must be submitted on Army Medical Library official order blanks (AML Form 48). A supply will be furnished on request.

All purchase orders must be accompanied by payment in cash, or by check or money order made payable to the Treasurer of the United States; or by Army Medical Library Coupons which may be ordered in any quantity from the Library at 50 cents each.

Federal agencies will be billed periodically by means of Standard Form 1080 (Voucher).

Refunds for material the Library is unable to supply will be made by coupons unless cash refund is specifically requested.

The CURRENT LIST OF MEDICAL LITERATURE is for sale by the Superintendent of Documents, U. S. Government Printing Office, Washington 25, D. C. Price: \$3.00 per year (\$3.75 foreign); 10 cents per single copy. All communications regarding subscriptions should be addressed to the Superintendent of Documents.

Published weekly by the ARMY MEDICAL LIBRARY, 7th Street & Independence Ave., S. W., Washington 25, D. C., as an intraservice publication of the Department of the Army. Lists articles of medical interest contained in current journals received. Subject index provided monthly. Exchange invited.

CURRENT LIST OF MEDICAL LITERATURE
Vol. 17, No. 14 October 21, 1949

2. Anatomy; Histology

Acta anat., Basel, 1949, 8: No. 1-2

- LUDWIG, E. Beitrag zur Entwicklungsgeschichte der Nachläre. 1-17.
BOEKE, J. The sympathetic endformation, its synaptology, the interstitial cells, the peritermal network, and its bearing on the neurone theory, discussion and critique. '18-61.
GUERRIER, Y. Les nerfs vertébraux. 62-90.
ALDMAN, B., CLAESSEON, L. [et al.] Studies on the storage of the oestrogen precursor in the interstitial gland of the ovary of rats treated with oestradiol benzoate and progesterone. 91-5.
THEILER, K. Studien zur Entwicklung der Ganglienleiste; Befunde zur Frühentwicklung der Ganglienleiste beim Menschen. 96-112.
HANZON, V., & HOLMGREN, H. A vital microscope. 113-21.
MATOLTSY, A. G., & HANZON, V. Microcinematographical observation of the shortening of actomyosin threads and muscle fibres on the effect of adenosinotriphosphate. 122-9.
NEMEC, H. Ueber die morphologische Polarisierung der Ganglienzellen im Rückenmark. 130-5.
EBERL-ROTHE, G. Ueber das Vorkommen von albuminösen Drüsen im Oesophagus. 136-41.
HROMADA, J. Report on a third fully developed kidney in a 9 month old foetus and on the possibilities of its origin. 142-55.
DONTENWILL, W. Die funktionelle Morphologie der tunica propria linguae beim Menschen. 150-67.
HIRSCH, S., & BUCHER, O. Grundsätzliches zur Frage der Regulationsrichtungen im Coronarkreislauf. 168-89.
HILLARP, N. A. Some critical remarks on the problem of the double innervation of salivary gland cells. 191-200.

J. Morph., 1949, 85: No. 1 (July)

- HIRSHFIELD, H. The morphology of *Urceolaria karyolobia*, sp. nov., *Trichodina tegula*, sp. nov., and *Scyphidia ubiquita*, sp. nov.; three new ciliates from southern California limpets and turban. 1-35, incl. 3 pl.
PALADE, G. E., & CLAUDE, A. The nature of the Golgi apparatus; parallelism between intercellular myelin figures and Golgi apparatus in somatic cells. 35-69, incl. 7 pl.
PALADE, G. E., & CLAUDE, A. The nature of the Golgi apparatus; identification of the Golgi apparatus with a complex of myelin figures. 71-111, incl. 2 pl.
SPEIDEL, C. C. Correlated studies of sense organs and nerves of the lateral-line in living frog tadpoles; experiments on the orange granules and sense hairs of denervated and innervated organs. 113-39.
FRANCIS, K. C., & MULLIGAN, R. M. The weight of the pituitary gland of the male dog in relation to body weight and age, with a differential cell count of the anterior lobe. 141-61.

3. Cancer

Cancer Bull., Wash., 1949, 2: No. 2 (Aug.)

[Issued with Med. Ann. District of Columbia, 1949, 18: No. 8 (Aug.)]

- BRICK, I. B., & JEGHERS, H. The variability of the clinical features of gastric cancer. 5-8.
